

BABCOCK NOELL

# RADIATION SHIELDING WINDOWS

NUCLEAR TECHNOLOGIES

## Radiation Shielding Windows

Babcock Noell has many years of experience in the design, calculation and manufacturing of radiation shielding windows, including the relevant wall frames. The thickness of the glass block as well as the glass material are chosen according to client requirements and radiological necessities.

Furthermore, Babcock Noell has taken over the technology from Schott and offers services such as e. g. replacement and retrofitting of windows and/or individual glasses as well as cleaning of windows.
